When you need to see a doctor, surely you will want to see a good one. But there is one important thing you may never have thought about: Has your doctor rested enough?

Doctors in our country often have to work 34 hours or longer without sleep. Most of them work 104 hours a week, and some even 150. (There are only 168 hours a week!) One report said that a doctor who works such long hours cannot think more clearly than a drunk driver. Another found that doctors who sleep 5.8 fewer hours than the week before might make 22% more serious mistakes. Surely no one wants to get in a car that is driven by a drunk driver. So, how safe would you feel when you are under the care of a tired doctor?

Sadly <u>this problem</u> has been around for a long time. There are no laws about it yet and hospital bosses don't look like they care either. And that is why we doctors are asking you to join us on the street this Sunday. Fight together with us on the street so we can fight better for your life in the hospital.

#### SEA LIONS

Sea lions have ear flaps. They are usually brown. Sea lions spend most of their time on land. Their back flippers can move in a circle, so it's easy for them to move on land. When they swim, they move their front flippers. They can be underwater for 8 to 20 minutes. Sea lions live in groups. They are noisy and "talk" loudly. But a baby sea lion is still able to hear its mother even when many mother sea lions are calling out for their babies at the same time.

#### SEALS

Seals don't have ear flaps. Baby seals are all white, and adult seals are usually gray with dark spots. Seals spend most of their time in water. They can stay underwater for 2 hours! They are good swimmers because they can swim with their back flippers, which are like fish tails. However, their back flippers cannot move in a circle, so it's not easy for them to move on land. They seldom come to land except when they want to have babies. Seals usually live alone. They are quiet and only make short soft sounds.

In Taiwan, more than ten million people eat out every day. And every day 17.5 million paper lunch boxes and 2.8 million pairs of chopsticks are thrown away after they are used just once. That's a lot of garbage.

Now, a new kind of paper lunch box could help a little with this problem. This new lunch box doesn't look much different from other lunch boxes. But on the back of its cover, there is a dotted line in the shape of a spoon or a pair of chopsticks. Pull off the piece along the dotted line and you'll get a spoon or chopsticks. You can use them to eat. This way, less garbage is made after the meal. Besides, you'll never have to worry about bringing a spoon or chopsticks with you.

Though this new lunch box will still be used just once and thrown away, for restaurants that sell hundreds of boxed lunches a day and for people who need to buy them, it is a lovely idea that makes eating out friendlier to our planet.

🛄 dotted line 虛線

- 29. What is special about the new lunch box?
  - (A) It helps make less garbage.
  - (B) It is light and very easy to carry.
  - (C) It helps keep food fresh for longer.
  - (D) It can be washed and used many times.

30. Which of the four things below is designed in the same way as the new lunch box?

🛄 design 設計

Don't worry that you'll make garbage after you use this dish. It is made of leaves! Just put it in the ground in your garden.

After you finish eating with this spoon, you can eat the spoon too! It is made of rice and flour.

The cover of this butter package can be used as a knife! No other knife is needed.

You can not only write on this note paper but also grow plants with it. There are seeds inside the paper!

31. In the second paragraph, the writer writes that the new lunch box "could help a little with this problem." Why does the writer say "a little"?

- (A) Because restaurants may not want to use it.
- (B) Because it is still used once and thrown away.
- (C) Because it makes eating out more convenient.
- (D) Because it looks just like any other lunch box.

# The Pick of the Week

Every Friday night, people get together and roller skate in the center of the city, and they make up a line of 10 miles! Even the police roller skate. They wear roller skates to help watch roller skaters. What do you think about Friday Night Skate? Tell us!

#### • <u>Roy</u> wrote:

I've never missed it. I mean, it's the only chance that I can roller skate on the road without worrying I might get hit by cars. I have great fun. But still, I hope there will be special paths for roller skaters.

#### 2 Ian wrote:

I haven't had a good night's sleep on Fridays since this roller skating thing started. These roller skaters shout and sing when they roller skate by my apartment. It'd be OK if they sang well. But they DON'T!

• <u>Ursula</u> wrote:

Friday Night Skate brings noise and trash and makes me want to move!

#### • <u>Zoe</u> wrote:

What the city must think about is where roller skaters should skate. Roller skaters may easily get hit when they skate on the road, but they may hit people when they skate on the sidewalk. It's good that the city opens the roads to roller skaters on Friday nights, but it only fixes part of the problem.

#### Jim Webb Oct. 16, 1987

Over the years, the number of whales has dropped sharply. From 1946 to 1986, about 340,000 whales were killed. People worry that children in the future can only see whales in pictures. They believe all kinds of whaling (whale hunting) should be stopped before it's too late.

Some people are trying to stop whaling all over the world. But they fail to notice one fact: Whaling was going on for a long time before the number of whales went down and became a problem.

Whaling started as early as 1,500 years ago. This was how tribespeople fed their families. They hunted whales for meat because almost nothing could grow on their land. They also made whale fat into oil and used it to make candles or oil lamps. Over the years, whaling became their way of living, and even part of who they are.

Tribe whaling is not the thing we should worry about. Of all the whales that were killed over the past forty years, only 10% were hunted by tribespeople. The other 90% died at the hands of the money-making whaling business. When we try to stop all kinds of whaling, we should think what we are asking tribespeople to give up and whether this is the best answer to the problem of whaling.

Jerry Stevens has been unhappy these months. He <u>38</u> a proud businessman of a successful shaved ice shop. His highest sales numbers were 1,899 plates a week; people called him "Ice King." Dan was a nice young man with a simple mind, too simple, maybe. He always let people try some shaved ice for free, but he never learned to see when "some" became "too much." Many people came, but few bought. When the sales did not grow with the heat, Jerry started to worry. He wanted to send Dan home. But how could he? Dan had no family except him.

Then, one day, <u>40</u>. And it was from across the street. The cookie shop <u>41</u> a clerk. For Jerry, it was a great chance to get Dan out of his store without sending him home. After taking the shopkeeper to several nice dinners, Jerry got Dan the job.
